AirRescue Magazine is the official publication of the European HEMS & Air Ambulance Committee (EHAC).

AIRMED 2014:

HEMS innovations@World Congress

The 2014 AIRMED gave opportunity for prehospital professionals to share their wealth of knowledge in order to improve aeromedical services across the world.

06

Burn injuries: Which steps to take? An overview

The initial assessment of the extent and depth of burns are often difficult. The first steps taken are all the more crucial for clinical progression and prognosis.

14

Airways: Children are not small adults

There are significant differences between neonatal and adult airways. They can impact the ability to manage airways and influence the adjuncts used.

22

Mechanical or manual? Chest compression's state of the art

It is rather difficult to define the value of mechanical chest compression devices. Most of the research data are available for the Lucas Device and the AutoPulse.

CONTENTS

AIRMED 2014

- 12** AIRMED World Congress
in review
L. Rosson

-
- 06** News

MEDICAL CARE

- 14** Managing burns patients in HEMS and
air ambulance service – an overview
J.-E. Harbarth

- 18** HEMS in Scandinavia provided
by anaesthesiologists – Who are the
beneficiaries and what are the needs?
K. Bache, A. Krüger, H.M. Lossius

- 22** Pediatric airways:
Children are not small adults
A. Sheno, S.B. Day

- 28** Real-time ultrasound:
Current pre-hospital applications and
future concepts
R. Breitzkreutz, D. Hempel, A.J. Teltzerow,
S. Blum, P.M. Zechner, F. Walcher

- 34** The massively bleeding patient:
time to transfuse
J.S. Hagemo

CASE REPORT

- 32** Septic or cardiogenic shock?
A Case of “Whodunnit”
A. Neglia, J. Bingaman

- 42** Surviving an amniotic fluid embolism
and placental abruption in the field
A. Lawrence

RESEARCH

- 46** Mechanical vs. manual
chest compression: State of the art
H.-C. Mochmann

- 50** Introducing HEMS into an “urban trauma
system”: Will it affect the outcome?
R. Hasselfeldt

IN PROFILE

- 53** Intensive care in the air
for two decades: Swedish Airborne
Intensive Care in Uppsala
D. Ohlén

MEDIA

- 58** Balancing patient privacy and
public demand for transparency
of ground and air rescue
M. Ramborg

TECHNOLOGY

- 60** From conventional to
performance-based navigation
G. Verlut

IN COURT

- 65** Air rescue in court –
take off and landing
M. Ufer
